

These are all the changes I've made to the DOSBox 0.74-3 Options.bat
This will affect all the MSDOS games

```
fullscreen=true
# fullscreen=false was the original setting

fullresolution=1920x1080
#fullresolution=original was the original setting

output=opengl
#output=surface was the original setting

aspect=true
#aspect=false was the original setting

mount c c:\dos\c
c:
# these 2 lines are new, there was nothing before
```

So in my C:\dos folder I have 3 folders which are
C folder in which I'll put all my unzipped MSDOS games in their own folder
DOSBox-0.74-3 in which the Emulator is
Downloads in which I keep my zip games downloaded from the internet (for fun)
