

Floor -6

There is nothing special on this floor. Note that the layout is completely different from the clue book, this version I'm playing is for MSDOS. I got some weapons +2 here and also a sword called Slayer of Dragons, but I prefer the weapons +2. I also got the Amulet of Jewels which allows you to cast DUMAPIC until it breaks down.

■ There is something here but I don't know what it is (it's not the missing blue ribbon)
X Pit, don't go there

Lift C This is the Lift from A to F, in other words from Floor -4 to Floor -9
(Here it's C for Level -6)
